**Veterinarian with extensive experience in general practice medicine and soft tissue surgery joins the Mt. Airy Animal Hospital team to further bolster the level of care and services offered to the pets of northwest Philadelphia and surrounding communities.**

We proudly welcome Dr. Brian Orr

**PHILADELPHIA, PA MARCH 26, 2018:** Mt. Airy Animal Hospital, a seasoned leader in veterinary care, is pleased to welcome Dr. Brian Orr.

Growing up on a small cattle farm in rural, Western Pennsylvania, Dr. Brian Orr developed a passion for science which led him to graduate from The Pennsylvania State University with honors, acquiring a Bachelor of Science degree in Animal Bioscience.

Dedicated to the field, he went on to obtain his Doctorate of Veterinary Medicine from the University of Pennsylvania School of Veterinary Medicine in 2005.

“Being an advocate for those without a voice, and caring for my patients if they were my own” is what Dr. Orr finds most satisfying about being a Veterinarian. “I have experience performing emergency services, which allows me to make a quick and well-rounded approach to difficult and urgent cases. I am driven to keep Philadelphia pets safe and healthy!”

Dr. Orr has special interest in internal medicine and soft tissue surgery.

Dr. Orr currently resides in Lower Merion with his family, which includes Arrow, a beautiful tuxedo cat. He enjoys hiking, fishing, back-yard birding, and almost anything involving nature.

Hakim Franklin, Hospital Administrator, says “our clients have been asking for a greater capacity to treat and respond to their pet's needs faster, and we have been working diligently to find the best staff members possible.”
